The Directors also confirmed that they will closely monitor the Continuing Connected Transactions to ensure that the respective existing annual caps for the year ending 31 December 2013 will not be exceeded.

PROPOSED ANNUAL CAPS

Set out below are the Annual Caps proposed by the Directors for each of the three years ending 31 December 2016 in respect of the Sale Transactions and Purchase Transactions:

| | Year ending 31 December | | |
|------------------------------|---------------------------------|---------------------------------|---------------------------------|
| | 2014 <i>(RMB'000)</i> | 2015 <i>(RMB'000)</i> | 2016 <i>(RMB'000)</i> |
| Sale Transactions | 493,000 | 676,000 | 870,000 |
| Purchase Transactions | 615,000 | 838,000 | 1,091,000 |

BASIS OF DETERMINATION OF THE PROPOSED ANNUAL CAPS

The above Annual Caps were determined by reference to (a) the historical transaction amounts of the Continuing Connected Transactions during the ten months ended 31 October 2013; and (b) the target sale volume of Wuling Industrial Group and Liuzhou Wuling Group for the three years ending 31 December 2016. In addition, a buffer of 5% for (i) any transactions of similar nature which may be entered into with Liuzhou Wuling Group in the three years ending 31 December 2016; and (ii) any unforeseeable circumstances, in particular, unexpected market fluctuations, change in government policies on automobile industry, fluctuations in raw material costs and increase in labour costs, is also considered.

In determining the target sale volume, Wuling Industrial Group and Liuzhou Wuling Group have assumed the sale and production volume of the passenger mini-buses (currently mainly school buses and some buses for other purposes in future) produced by Guilin Bus will be gradually increased from the target volume of 4,600 vehicles for 2013 to 5,400 vehicles, 7,500 vehicles and 10,000 vehicles respectively for the three years ending 31 December 2016. Such increases will contribute to significant increases in the value of transactions of the related Baomali Purchase Transactions, KE Purchase Transactions and GB Trading Transactions which results in significant increases in the amounts of Continuing Connected Transactions.

Meanwhile, Wuling Industrial Group and Liuzhou Wuling Group expect a more prominent increase of about 60% (inclusive of the abovementioned 5% buffer) for the value of GL Sale Transactions for the year ending 31 December 2014 as compared to the annual cap for the year ending 31 December 2013, resulting from an expansion of its production capacity. After that, moderate increases of about 28% and 25% (both inclusive of the abovementioned 5% buffer) respectively are expected for the two years ending 31 December 2016. For the GL Purchase Transactions, gradual increases range from 18% to 27% annually (inclusive of the abovementioned 5% buffer) are expected for the three years ending 31 December 2016.
