To the Shareholders

Dear Sirs,

MAJOR TRANSACTION REGARDING FINANCE LEASE ARRANGEMENT

INTRODUCTION

On 23 November 2009, Red Board, an indirect wholly-owned subsidiary of the Company, and SMFL(HK) entered into the Lease Agreement, pursuant to which Red Board agreed to rent from SMFL(HK), and SMFL(HK) agreed to lease to Red Board, the Machineries for a total lease payments of HK\$22,236,000 (comprising the principal of HK\$20,400,000 and interest of HK\$1,836,000) for a term of 36 months. The purpose of this circular is to provide you with further information in respect of the details of the Lease Arrangement.

LETTER FROM THE BOARD

THE LEASE AGREEMENT

Date

23 November 2009

Parties

Leasee: Red Board, an indirect wholly-owned subsidiary of the Company

Lessor: SMFL(HK), a company principally engaged in the business of finance lease. To the best of the Directors' knowledge, information and belief, having made all reasonable enquiries, SMFL(HK) and its ultimate beneficial owners are third parties independent of the Company and its connected persons.

Subject matter

The Machineries, being 20 sets of drilling machines, owned by SMFL(HK) and leased to Red Board pursuant to the Lease Agreement.

Lease period

The lease period for the Machineries is 36 months, commencing on 1 December 2009.

Lease payments

The principal amount of the finance lease, representing the total cost of the Machineries, is HK\$20,400,000. The total interest payments under the Lease Arrangement amounted to HK\$1,836,000, which is calculated at a fixed interest rate of 6.29% per annum on the total outstanding principal. The total lease payments are HK\$22,236,000, of which an initial payment of HK\$2,040,000 has been paid by Red Board to SMFL(HK) and the remaining balance shall be paid by 36 monthly installments in the amount of HK\$561,000 per month (each comprising the principal and interest components), commencing on 1 December 2009, being the date of acceptance of the Machineries by Red Board.

The lease payments were determined after arm's length negotiations between Red Board and SMFL(HK) with reference to the prevailing market rate for finance leases of comparable machineries. The Directors consider that the lease payments are fair and reasonable and on normal commercial terms.

Ownership

The legal titles of the Machineries shall vest in SMFL(HK) throughout the lease period. Subject to Red Board having duly and satisfactorily performed all its obligations under, and upon the expiry of, the Lease Agreement, Red Board has an option to purchase the Machineries from SMFL(HK) at an agreed amount of HK\$50,000.

LETTER FROM THE BOARD

REASONS FOR THE LEASE ARRANGEMENT

The Group is principally engaged in the manufacturing and sale of printed circuit boards and consumer electronics products. Red Board is a wholly-owned subsidiary of the Company and it is principally engaged in the design and sale of printed circuit boards.

Given that the entering into of the Lease Arrangement shall enable the Group to meet its production and operation needs with no immediate lump-sum payment for the Machineries, the Directors are of the opinion that the terms of the Lease Arrangement are fair and reasonable and in the interests of the Company and the Shareholders as a whole.

FINANCIAL EFFECTS OF THE LEASE ARRANGEMENT

The Group's earnings shall decrease as a result of the payment of finance charges (i.e. the interest component of the lease payments) over the 36 months' lease term under the Lease Arrangement. The Group's assets shall increase by the lower of the fair value of the Machineries and the present value of the minimum lease payments, while the Group's liabilities shall increase by the liability component of the lease payments.

FINANCIAL AND TRADING PROSPECT OF THE GROUP

For the six months ended 30 September 2009, the revenue of the Group amounted to approximately HK\$470.9 million, representing a reduction of approximately 21.0% as compared to the last corresponding period. The decrease was mainly attributable to the adverse impacts of the global economic downturn. Resulted from the decrease in sales, increase in depreciation expenses of the new factory in Jiangxi which commenced production in March 2009 and the increase in finance costs caused by the additional loans for financing the construction and operation of the factory in Jiangxi, the profit attributable to the Shareholders for the six months ended 30 September 2009 decreased by approximately 88.0%, as compared to the previous corresponding period, to approximately HK\$2.4 million.

The first production line in the new Jiangxi factory, with maximum production capacity of printed circuit boards of approximately 350,000 square feet per month, commenced its production in March 2009, which increased the overall production capacity of the Group by approximately 40%. The Directors are of the view that printed circuit boards business, which accounted for approximately 94.9% of the revenue of the Group for the six months ended 30 September 2009, shall remain as the core business of the Group in the future and the improved production capacity shall enable the Group to have sufficient production capacity to fulfill orders from the customers once the global market turns around. In the short run, the economic environment is still challenging and the business of the Group remains difficult. The Directors hold a conservative view on the Group's sales and results for the current financial year. However, in consideration of the increasing demand of the high density interconnect boards installed inside 3G mobile phones and netbooks in the PRC and the implementation of stimulus policy on the domestic economy by the government of the PRC, the Directors maintain a positive view on the future prospect of the Group in the long run.

LETTER FROM THE BOARD

IMPLICATION OF THE LISTING RULES

The Lease Arrangement constitutes a major transaction for the Company under Chapter 14 of the Listing Rules and therefore is subject to the approval by the Shareholders at a general meeting. On the basis that (i) no existing Shareholder has any material interest in the Lease Arrangement and, as such, no Shareholder is required to abstain from voting if the Company were to convene a general meeting for the approval of the Lease Arrangement; and (ii) the Company has obtained a written shareholder's approval for the Lease Arrangement from Sum Tai Holdings Limited, which was interested in 29,577,475 Shares, representing approximately 51.96% of the issued share capital of the Company as at the Latest Practicable Date, such written approval be accepted in lieu of holding a general meeting of the Company pursuant to Rule 14.44 of the Listing Rules.

ADDITIONAL INFORMATION

Your attention is also drawn to the additional information set out in the appendices to this circular.

Yours faithfully,
By the Order of the Board
Same Time Holdings Limited
Yip Sum Yin
Chairman

Notes to the Financial Statements*For the year ended 31 March 2009***1 GENERAL INFORMATION**

Same Time Holdings Limited (the “Company”) is a limited liability company incorporated in Bermuda and listed on the Main Board of The Stock Exchange of Hong Kong Limited. The address of its registered office is Canon’s Court 22 Victoria Street, Hamilton HM 12, Bermuda. The address of its principal office is 17th Floor, Phase I, Kingsford Industrial Building, 26-32 Kwai Hei Street, Kwai Chung, New Territories, Hong Kong.

The Company and its subsidiaries (together the “Group”) are principally engaged in the manufacturing and selling of consumer electronic products and printed circuit boards.

These consolidated financial statements are presented in Hong Kong dollars, unless otherwise stated. These consolidated financial statements have been approved for issue by the Board of Directors on 17 July 2009.

2 PRINCIPAL ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation

The consolidated financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRS”) issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”). They have been prepared under the historical cost convention, as modified by the revaluation of derivative financial assets and liabilities, which are carried at fair value.

The preparation of consolidated financial statements in conformity with HKFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed in note 4.

As at 31 March 2009, the Group had net current liabilities of HK\$257 million. The directors of the Company have reviewed the Group’s cash flow projection which is prepared based on the assumption that the Group’s existing banking facilities will be continued or can be replaced by new facilities. Details of the Group’s available banking facilities, the utilisation and the net book amount of assets pledged for such facilities as at 31 March 2009 are set out in note 34 below. Please also refer to note 18 for details of the breach of a bank loan covenant as at 31 March 2009 and the waiver of strict compliance of such covenant subsequently received from the relevant bank. Based on the latest progress of renewal of banking facilities up to the date of these financial statements, the waiver received from the relevant bank and the flexibility for the Group to raise additional secured bank loans by pledging its property, plant and equipment which are currently free from encumbrances, the directors believe that the Group will have sufficient financial resources to finance its operations and continue as a going concern in the foreseeable future. Consequently, the directors have prepared the consolidated financial statements on a going concern basis.

(i) *Amendments and interpretation that are effective for the year ended 31 March 2009*

The Group has adopted the following amendments and interpretation which are relevant to the Group's operations, and mandatory for the year ended 31 March 2009:

HKAS 39 and HKFRS 7 (Amendments)	Reclassification of financial assets
HK(IFRIC)-Int 11	HKFRS 2 – Group and treasury share transactions

The adoption of the above amendments and interpretation do not have any significant impacts on the Group's financial statements.

(ii) *Standards, interpretations, amendments and improvements to existing standards which are not yet effective for the year ended 31 March 2009*

The HKICPA has issued the following new or revised HKFRS, interpretations, amendments and improvements to existing standards which are not yet effective for the year ended 31 March 2009 and have not been early adopted by the Group:

The directors are in the process of reviewing the impact to the Group's financial statements in respect of the adoption of these standards, amendments and interpretations to existing standards.

(b) Consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries made up to 31 March.

(i) Subsidiaries

Subsidiaries are companies over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured at the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated but considered as an indicator of impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary in the consolidated financial statements to ensure consistency with the policies adopted by the Group.

In the balance sheet of the Company, investments in subsidiaries are carried at cost less impairment losses (note 2(i)). The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

(ii) Associate

An associate is an entity over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investment in an associate is accounted for using the equity method of accounting and is initially recognised at cost. The Group's investment in an associate includes goodwill (net of any accumulated impairment loss) identified on acquisition.

The share of post-acquisition profits or losses of associate attributable to the Group is recognised in the income statement, and the share of post-acquisition reserves is recognised in reserves. The cumulative share of post-acquisition reserves is included in the carrying amount of the investment. When the share of losses of the Group in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associate are eliminated to the extent of the interest in the associate held by the Group. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

(c) **Segment reporting**

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and returns that are different from those of segments operating in other economic environments.

(d) **Translation of foreign currencies**

(i) *Functional and presentation currency*

Transactions included in the financial statements of each of the entities of the Group are measured using the currency of the primary economic environment in which the entity operates (“the functional currency”). The consolidated financial statements are presented in Hong Kong dollars, which is the functional and presentation currency of the Company.

(ii) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

(iii) *Group companies*

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the exchange rates prevailing on the dates of the transactions); and
- all resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities, and of borrowings and other currency instruments designated as hedges of such investments, are taken to shareholders’ equity. When a foreign operation is sold, such exchange differences are recognised in the income statement as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

(e) Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the carrying amount of the asset or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed in the income statement during the financial period in which they are incurred.

Depreciation is calculated using the straight-line method to allocate their costs to their residual values over their estimated useful lives at the following annual rates:

Buildings	2 – 4%
Plant and machinery	10 – 25%
Leasehold improvements	20 – 25%
Furniture, fixtures and equipment	20 – 25%
Motor vehicles	25 – 30%

Construction in progress represents plant under construction which is carried at cost less any accumulated impairment losses.

Construction in progress includes construction expenditure incurred and other direct costs attributable to the construction. On completion, the construction in progress is transferred to appropriate categories of property, plant and equipment. No depreciation is provided for construction in progress.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 2(i)).

The gain or loss arising from the disposal or retirement of an asset is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in the income statement.

(f) Leasehold land and land use rights

Leasehold land and land use rights represent non-refundable rental payments for lease of land. These are stated at cost less accumulated amortisation and impairment losses. Amortisation is provided to write off the amount paid over the period of the lease on a straight-line basis.

(g) Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property.

Investment property is stated at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the property.

Subsequent expenditure is charged to the carrying amount of the property only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed in the income statement during the financial year in which they are incurred.

Depreciation of investment property is calculated using the straight-line method to write off its cost less residual value over its estimated useful life.

The gain or loss arising from the disposal of an investment property is determined as the difference between the sale proceeds and the carrying amount of the investment property and is recognised in the income statement.

The investment property's residual value and useful life are reviewed, and adjusted if appropriate, at each balance sheet date.

(h) Leases

(i) Operating lease (as the lessee to operating leases)

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases net of any incentives received from the lessor are expensed in the income statement on a straight-line basis over the period of the lease.

(ii) Finance lease

Leases of property, plant and equipment where the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance lease are capitalised at the lease's commencement at the lower of fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance lease balance outstanding. The corresponding rental obligations, net of finance charges, are included in borrowings. The interest element of the finance lease is recognised in the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under financial leases are depreciated over the shorter of the useful life of the assets and the lease term.

(i) Impairment of investments in subsidiaries, associates and non-financial assets

Assets that have an indefinite useful life or have not yet been available for use are not subject to amortisation and are tested annually for impairment. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

(j) Inventories

Inventories comprise finished goods, work in progress and raw materials and are stated at the lower of cost and net realisable value. Cost, calculated on the weighted average basis, comprises materials, direct labour and an appropriate proportion of all production overhead expenditure. Net realisable value is determined on the basis of anticipated sales proceeds less estimated selling expenses.

(k) Derivative financial instruments

The Group has entered into certain foreign currency forward contracts which are not qualified for hedge accounting. These derivative instruments are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Changes in the fair value of these derivative instruments are recognised in the income statement within “other operating income” or “other operating expenses”.

(l) Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade and other receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the receivable is impaired. The amount of the provision is the difference between the asset’s carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the assets is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement. When a receivable is uncollectible, it is written off against the allowance account for receivables. Subsequent recoveries of amounts previously written off are credited in the income statement.

(m) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and bank overdrafts. Bank overdrafts are shown within short-term bank loans and bank overdrafts in current liabilities on the balance sheet.

(n) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

(o) Current and deferred income tax

The income tax expense for the period comprises current and deferred income tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised directly in equity. In this case, the tax is also recognised in equity.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Group operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

(p) Trade and other payables

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

(q) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(r) Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns and discounts and after eliminating sales within the Group.

Revenue from the manufacturing and sales of products is recognised on the transfer of risks and rewards of ownership, which generally coincides with the time when the goods are delivered to customers and title has passed.

Interest income is recognised on a time-proportion basis using the effective interest method.

Rental income from letting of investment properties is recognised on a straight-line basis over the lease term.

(s) Employee benefits*(i) Employee leave entitlements*

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the balance sheet date.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

(ii) Bonus plans

The expected cost of bonus payments is recognised as a liability when the Group has a present legal or constructive obligation as a result of services rendered by employees and a reliable estimate of the obligation can be made.

Liabilities for bonus plans are expected to be settled within 12 months and are measured at the amounts expected to be paid when they are settled.

(iii) Retirement benefit obligations

The Group operates a number of defined contribution retirement schemes in Hong Kong and Mainland China. The contributions of the Group to the defined contribution retirement schemes are recognised in the period to which they relate and are reduced by contributions forfeited by those employees who leave the schemes before vesting fully in the contributions. The contributions of the Group to the mandatory provident fund scheme (“MPF Scheme”) and other defined contribution retirement schemes are recognised in the period to which they relate. The assets of these schemes are held separately from those of the Group in independently administered funds.

(t) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of these assets. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Capitalisation of borrowing costs ceases when the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised as expenses in the year in which they are incurred.

(u) Dividend distribution

Dividend distribution to the shareholders of the Company is recognised as a liability in the Group’s financial statements in the period in which the dividends are approved by the shareholders/directors of the Company.

(v) Government grants

A government grant is recognised when there is reasonable assurance that the Group will comply with the conditions attaching with it and that the grant will be received.

Grants relating to the construction of plant are included in non-current liabilities as deferred income and are credited to the income statement on a straight-line basis over the expected useful lives of the related assets.

3 FINANCIAL RISK MANAGEMENT**(a) Financial risk factors**

The Group's activities expose it to various types of financial risk which includes currency risk, credit risk, liquidity risk and interest rate risk. The overall risk management programme of the Group focuses on the unpredictability of financial markets and seeks to minimise the potential adverse effects it may have on the financial performance of the Group.

(i) Currency risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to EURO and Renminbi. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations. Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the entity's functional currency.

The Group has certain investments in foreign operations, whose net assets are exposed to foreign currency translation risk.

At 31 March 2009, if Hong Kong dollars had weakened/strengthened by 20% (2008: 10%) against EURO with all other variables held constant, the post-tax profit for the year would have been approximately HK\$1.5 million higher/lower (2008: HK\$0.1 million), mainly as a result of foreign exchange gains/losses on translation of EURO-denominated trade and other receivables.

At 31 March 2009, if Hong Kong dollars had weakened/strengthened by 3.5% (2008: 5%) against Renminbi with all other variables held constant, there would be no material effect on profit for the year, but equity would have been approximately HK\$26.2 million (2008: HK\$28.2 million) higher/lower, mainly as a result of foreign exchange gains/losses on translation of Renminbi-denominated operations.

(ii) Interest rate risk

As the Group has no significant interest-bearing assets (other than bank deposits) and interest income from bank deposits are not significant. As such, the Group's income and operating cash flows are substantially independent of changes in market interest rates.

The Group's interest rate risk arises from borrowings. The Group's borrowings are issued at variable rates which expose the Group to cash flow interest rate risk. The Group currently does not have a hedging policy on interest rate exposure. However, the management monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arises.

If interest rates on borrowings had been 50 basis points higher/lower with all other variables held constant, the post-tax profit for the year would have been approximately HK\$1.6 million (2008: HK\$1.3 million) lower/higher mainly as a result of higher/lower interest expenses on floating rate borrowings.

(iii) Credit risk

The Group has some concentration of credit risk in respect of sales of products with 31% (2008: 36%) of total sales for the year being attributable to its top five customers. The Group has policies in place to ensure that sales of products are made to customers with an appropriate credit history. In addition, collection of receivables is monitored on an ongoing basis.

The credit risk for bank deposits and bank balances is minimal as such amounts are placed with banks with good credit ratings.

(iv) Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans and finance leases. The Group maintains liquidity by keeping sufficient committed credit lines available.

Management monitors rolling forecasts of the Group's liquidity reserve which comprises undrawn borrowing facility and cash and cash equivalents on the basis of expected cash flows.

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity dates. The amounts disclosed in the table are the contractual undiscounted cash flows.

Total	<u>537,714,219</u>	<u>47,217,373</u>	<u>21,162,820</u>

(b) Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net borrowings divided by total capital. Net borrowings are calculated as total borrowings (including current and non-current bank borrowings and other long-term loans as shown in the balance sheet) less cash at banks and in hand. Total capital is calculated as "equity", as shown in the balance sheet.

The gearing ratios at 31 March 2009 and 2008 were as follows:

	2009 <i>HK\$</i>	2008 <i>HK\$</i>
Total borrowings	356,189,163	294,912,807
Less: Cash at banks and in hand	(52,747,732)	(72,248,233)
	<hr/>	<hr/>
Net borrowings	303,441,431	222,664,574
Total equity	429,480,590	384,300,125
	<hr/>	<hr/>
Gearing ratio	71%	58%
	<hr/> <hr/>	<hr/> <hr/>

(c) Fair value estimation

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price.

The fair values of long-term borrowings are estimated using the expected future payments discounted at market interest rates.

The carrying amounts less any estimated credit adjustments for financial assets and liabilities with a maturity of less than one year, including trade and other receivables, cash and cash equivalents, trade and other payables and current borrowings approximate their fair values.

4 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(a) Impairment of machinery

The Group has made substantial investments in machinery for the manufacturing of electronic products and printed circuit boards. Changes in technology on machinery or products to be manufactured may cause a change in the estimated useful lives or value of these assets.

The Group evaluates whether there is any event or change in circumstances which indicates that the carrying amounts of machinery may not be recoverable. Whenever such events or changes in circumstances occur, these assets are reviewed for impairment in accordance with the accounting policy set out in note 2(i). The management has not identified any indication of impairment of these assets.

(b) Income taxes

The Group is subject to income taxes in several jurisdictions. There are certain transactions and calculations for which the ultimate tax determination may be uncertain. The Group recognises liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax provisions in the financial period in which such determination is made.

Recognition of deferred income tax asset, which principally relates to tax losses of certain subsidiaries, depends on the management's expectation of future taxable profit that will be available against which the tax losses can be utilised. The outcome of their actual utilisation may be different.

(c) Trade and other receivables

The Group's management determines the provision for impairment of trade and other receivables based on an assessment of the recoverability of the receivables. The assessment is based on the credit history of its customers and other debtors and the current market condition and requires the use of judgements and estimates. Management reassesses the provision at each balance sheet date.

	Group	
	2009 HK\$	2008 HK\$
At the beginning of the year	–	6,173,728
Uncollectible debts written off against provision	–	(3,060,511)
Write back of provision	–	(3,113,217)
	–	–
At the end of the year	–	–

No provision for impairment of trade receivables was made for the year (2008 : Nil). The release of provision for impaired trade receivables had been credited to the income statement. Amounts charged to the allowance account are generally written off when there is no expectation of recovering additional cash.

During the year, bad debts of HK\$4,251,647 (2008 : HK\$1,594,612) have been directly written off. The amount has been charged to other operating expenses in the income statement.

(c) At 31 March 2009, included in deposits, prepayments and other receivables was an amount of HK\$19,368,302 (2008: HK\$14,827,862) which represents refundable value-added tax.

Other receivables and deposits do not contain past due or impaired assets.

(d) The Group and Company do not hold any collateral as security.

The maximum exposure to credit risk at the reporting date is the carrying amount of each class of receivables mentioned above.

13 DERIVATIVE FINANCIAL ASSETS/LIABILITIES

The derivative financial instruments represent forward foreign exchange contracts held for trading, are classified as current assets or liabilities and are expected to settle at various dates during the next 12 months.

The notional principal amounts of the outstanding forward foreign exchange contracts at 31 March 2009 were approximately HK\$35.4 million, (2008: HK\$101.1 million) in aggregate.

(a) The contributed surplus of the Company represents:

- (i) the difference in value at 4 March 1992 between the nominal value of the Company's shares issued in exchange for all the issued ordinary shares of Same Time International (B.V.I.) Limited and the value of net assets of the underlying subsidiaries acquired on that date amounting to HK\$37,115,065; and
- (ii) the amount of HK\$15,940,952 credited to the contributed surplus as a result of the capital reduction and consolidation of shares of the Company on 16 September 2003.

(b) The contributed surplus of the Company is distributable under the Companies Act 1981 of Bermuda. However, the Company shall not declare or pay a dividend, or make a distribution out of contributed surplus, if:

- (i) the Company is, or would after the payment be, unable to pay its liabilities as they become due; or
- (ii) the realisable value of the Company's assets would thereby be less than the aggregate of its liabilities and its issued share capital and share premium accounts.

- (c) The legal reserve represents the amount set aside from the retained profits by a subsidiary incorporated in Macao in accordance with the Macao Commercial Code and is not distributable as dividend.

The Macao Commercial Code #377 requires that a company should set aside a minimum of 25% of the company's profit after tax to the legal reserve until the balance of the reserve reaches a level equivalent to 50% of the company's capital.

The exposure of the Group's bank loans and finance lease liabilities to interest-rate changes and the contractual repricing dates is minimal given the interest rates of the Group's bank loans and finance lease liabilities are renewable for the periods ranging from 1 month to 3 months.

The effective interest rates of the bank loans and the obligations under finance leases of the Group at 31 March 2009 were ranging from 2.40% to 7.83% per annum and ranging from 1.30% to 9.31% per annum respectively (2008: ranging from 3.15% to 4.75% per annum and ranging from 4.50% to 7.59% per annum respectively). The carrying amounts of the balances approximate their fair values.

One of the banking facilities granted to the Group has stipulated that the current ratio of the Group should not be less than 0.85. At 31 March 2009, the Group breached such covenant, and accordingly, the non-current portion of such bank loan amounting to HK\$6,000,000 under this banking facility was reclassified as a current liability in the balance sheet. Subsequent to 31 March 2009, the Group received confirmation from the relevant bank which waived the strict compliance of such covenant.

The effective interest rates of the short-term bank loans and bank overdrafts of the Group at 31 March 2009 were 4.61% (2008: 5.03%) per annum. The carrying amounts of the balances approximate their fair values.

At 31 March 2009, included in the short-term bank loans and bank overdrafts were balances amounting to HK\$66,326,531 (2008: HK\$5,476,451) which were denominated in Renminbi. The remaining balances were denominated in Hong Kong dollar.

20 DEFERRED INCOME TAX

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current income tax assets against current income tax liabilities and when the deferred income tax assets and liabilities relate to income taxed levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

The movements in the net deferred income tax liabilities are as follows:

	Group	
	2009 HK\$	2008 HK\$
At the beginning of the year	7,434,250	15,748,998
Effect of change in tax rate	(424,814)	–
Charged/(credited) to income statement (<i>note 26</i>)	170,777	(8,314,748)
	7,180,213	7,434,250
	7,180,213	7,434,250

A substantial portion of the deferred income tax liabilities will be settled after more than 12 months from the balance sheet date.

The movements in deferred income tax liabilities and assets (prior to offsetting of balances within the same taxation jurisdiction) during the year are as follows:

Deferred income tax liabilities

	Accelerated tax depreciation	
	2009	2008
	<i>HK\$</i>	<i>HK\$</i>

	<u>(5,070,110)</u>	<u>(1,086,553)</u>

Deferred income tax assets are recognised for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable. The Group has unrecognised tax losses of approximately HK\$84.7 million (2008: HK\$37.6 million) to carry forward against future taxable income. Included in unrecognised tax losses of approximately HK\$27.9 million (2008: HK\$0.5 million) that will expire from 2011 to 2014. Other tax losses have no expiry date.

21 DEFERRED INCOME

The deferred income represents government grants received for the construction of a plant in Jiangxi in the Mainland China, which is amortised over the expected useful life of the plant upon the commencement of the operation.

22 REVENUE AND SEGMENT INFORMATION

Revenue represents invoiced manufacturing and selling of electronics products and printed circuit boards.

Primary reporting format – business segments

The Group is organised on a worldwide basis into two main business segments:

- Electronic products – manufacturing and selling of consumer electronic products
- Printed circuit boards – manufacturing and selling of printed circuit boards

Unallocated costs represent corporate general and administrative expenses. Segment assets consist primarily of property, plant and equipment, leasehold land and land use rights, receivables and operating cash and exclude leasehold land and investment property held at corporate office. Segment liabilities comprise operating liabilities and exclude bank borrowings, obligations under finance leases, current income tax liabilities and deferred income tax liabilities. Capital expenditure comprises additions to property, plant and equipment, leasehold land and land use rights and investment property.

The Hong Kong Inland Revenue Department (the “IRD”) has questioned the basis of tax reporting for certain transactions adopted by certain subsidiaries of the Group in prior years. The matter has not been resolved with the IRD as at the date of approval of these financial statements. Additional provision for current income tax of approximately HK\$20.5 million and write back of deferred income tax liabilities of approximately HK\$8.3 million have been booked in respect of this matter in the Group’s consolidated financial statements for the year ended 31 March 2008. These are based on management’s estimates and may be different from the final outcome of the matter.

27 PROFIT ATTRIBUTABLE TO SHAREHOLDERS

Profit attributable to shareholders includes a loss of HK\$108,779 (2008: profit of HK\$28,445) which is dealt with in the financial statements of the Company.

28 DIVIDEND

The directors do not recommend the payment of a dividend for the year ended 31 March 2009.

The 2008 final dividend of HK\$0.02 per share was paid to the shareholders of the Company during the year.

29 EARNINGS PER SHARE

The calculation of basic earnings per share is based on profit attributable to shareholders of the Company of HK\$23,165,251 (2008: HK\$31,055,871) and the weighted average number of ordinary shares in issue during the year of 56,918,520 shares (2008: 54,354,258 shares).

As there are no potential ordinary shares in issue, there is no diluted earnings per share for both years.

31 DEFINED CONTRIBUTION PENSION SCHEMES

For the MPF Scheme, the contributions of the Group are at 5% of the employees' relevant income as defined in the Mandatory Provident Fund Schemes Ordinance up to a maximum of HK\$1,000 per employee per month. The employees contribute a corresponding amount to the MPF Scheme if their relevant income is more than HK\$5,000 per month. The MPF contributions are fully and immediately vested in the employees as accrued benefits once they are paid.

The Group also operates a defined contribution pension scheme, which is an exempted scheme ("the Exempted Scheme") under the Mandatory Provident Fund Schemes Ordinance and provides retirement benefits to its employees in Hong Kong who joined the Group prior to 1 December 2000. These employees can elect to join the MPF Scheme or to remain as a member of the Exempted Scheme. The assets of the Exempted Scheme are held under provident funds managed by an independent administrator. Under the Exempted Scheme, both the employers and employees are required to contribute 5% of the employees' basic salaries on a monthly basis. Where there are employees who leave the Exempted Scheme prior to vesting fully in the contributions, the contributions payable by the Group are reduced by the amount of forfeited contributions. There were no forfeited contributions utilised by the Group to reduce existing level of contributions for the years ended 31 March 2009 and 2008.

The Group also contributes to retirement plans for its employees in Mainland China at a percentage of their salaries in compliance with the requirements of the respective municipal governments in Mainland China. The municipal governments undertake to assume the retirement benefit obligations of all existing and future retired employees of the Group in Mainland China.

Notes to the Unaudited Condensed Consolidated Interim Financial Information**1 GENERAL INFORMATION**

The Company is a limited liability company incorporated in Bermuda and listed on the Main Board of The Stock Exchange of Hong Kong Limited. The address of its registered office is Canon's Court, 22 Victoria Street, Hamilton HM 12, Bermuda. The address of its principal office is 17th Floor, Phase I, Kingsford Industrial Building, 26-32 Kwai Hei Street, Kwai Chung, New Territories, Hong Kong.

The Group is principally engaged in the manufacturing and selling of consumer electronic products and printed circuit boards.

This Interim Financial Information is presented in Hong Kong dollars, unless otherwise stated. This Interim Financial Information has been approved for issue by the Board of Directors on 21 December 2009.

This Interim Financial Information has not been audited.

2 BASIS OF PREPARATION

This Interim Financial Information for the six months ended 30 September 2009 has been prepared in accordance with Hong Kong Accounting Standard ("HKAS") 34, "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

This Interim Financial Information should be read in conjunction with the annual financial statements for the year ended 31 March 2009, which have been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRS").

As at 30 September 2009, the Group had net current liabilities of HK\$328 million. The directors of the Company have reviewed the Group's cash flows projection which is prepared based on the assumption that the Group's existing banking facilities will continue to be available or can be replaced by new facilities. Details of the Group's available banking facilities, the utilisation and the net book amount of assets pledged for such facilities as at 30 September 2009 are set out in the section headed "Liquidity and financial resources" under "Management discussion and analysis" below. As at 30 September 2009, the Group breached a bank loan covenant of a bank. The total facilities from the bank were HK\$27 million of which HK\$26 million was utilised as at 30 September 2009. Management considers that the facilities available from the bank are not material compared to the overall financial resources and banking facilities available to the Group for its operations nor will it have material effect to the Group's cash flow projection. Based on the renewed banking facilities up to the date of this Interim Financial Information and the flexibility for the Group to raise additional secured bank loans by pledging its property, plant and equipment which are currently free from encumbrances, the directors believe that the Group will have sufficient financial resources to finance its operations and be able to continue as a going concern in the foreseeable future. Consequently, the directors have prepared the Interim Financial Information on a going concern basis.

3 ACCOUNTING POLICIES

Except as described below, the accounting policies adopted are consistent with those adopted and as described in the annual financial statements for the year ended 31 March 2009.

Taxes on income in the interim periods are accrued using the tax rates that will be applicable to the expected total annual earnings.

In the current period, the Group has adopted, for the first time, the following new or revised standards, amendments and interpretations (“new and revised HKFRSs”) which are mandatory for the accounting periods beginning on 1 April 2009:

HKAS 1 (Revised)	Presentation of financial statements
HKAS 23 (Revised)	Borrowing costs
HKAS 32 and HKAS 1 (Amendments)	Puttable financial instruments and obligations arising on liquidation
HKFRS 1 and HKAS 27 (Amendments)	Cost of an investment in a subsidiary, jointly controlled entity or associate
HKFRS 2 (Amendment)	Share-based payment – vesting conditions and cancellations
HKFRS 7 (Amendment)	Improving disclosures about financial instruments
HKFRS 8	Operating segments
HK(IFRIC) – Int 13	Customer loyalty programmes
HK(IFRIC) – Int 15	Agreements for the construction of real estate
HK(IFRIC) – Int 16	Hedges at a net investment in a foreign operation
HKFRSs (Amendments)	Improvements to HKFRSs issued in 2008, except for the amendment to HKFRS 5 that is effective for annual periods beginning on or after 1 July 2009
HKFRSs (Amendments)	Improvements to HKFRSs issued in 2009 in relation to the amendment to paragraph 80 of HKAS 39

The adoption of the above new and revised HKFRSs does not have any significant impacts on the financial statements of the Group for the current or prior accounting periods except for the impact as described below.

HKAS 1 (Revised), “Presentation of financial statements”

HKAS 1 (Revised) has introduced a number of terminology changes, including revised titles for the condensed consolidated financial statements, and has resulted in a number of changes in presentation and disclosure. However, HKAS 1 (Revised) has had no impact on the results reported in the consolidated financial statements of the Group.

HKFRS 8, “Operating segments”

HKFRS 8 is a disclosure standard that requires the identification of operating segments to be performed on the same basis as financial information that is reported internally for the purpose of allocating resources between segments and assessing their performance. The predecessor standard, HKAS 14 “Segment reporting”, required the identification of two sets of segments (business and geographical) using a risks and returns approach. In the past, the Group’s primary reporting format was business segments. The application of HKFRS 8 has not resulted in a redesignation of the Group’s reportable segments as compared with the primary reportable segments determined in accordance with HKAS 14 (see note 4).

The Group has not early adopted the following new or revised standards, amendments or interpretations that have been issued but are not yet effective for the accounting period beginning on 1 April 2009:

HKFRSs (Amendments)	Amendment to HKFRS 5 as part of improvements to HKFRSs issued in 2008
HKFRSs (Amendments)	Improvements to HKFRSs issued in 2009
HKAS 24 (Revised)	Related party disclosures
HKAS 27 (Revised)	Consolidated and separate financial statements
HKAS 32 (Amendment)	Financial instruments: presentation – classification of rights issues
HKAS 39 (Amendment)	Financial instruments: Recognition and measurement on eligible hedged Items
HKFRS 1 (Revised)	First-time adoption of HKFRS
HKFRS 2 (Amendment)	Group cash-settled share-based payment transactions
HKFRS 3 (Revised)	Business combinations
HKFRS 9	Financial instruments
HK(IFRIC) – Int 9 and HKAS 39 (Amendments)	Embedded derivatives
HK(IFRIC) – Int 17	Distributions of non cash-assets to owners
HK(IFRIC) – Int 18	Transfers of assets from customers

The directors are in the process of reviewing the impact to the Group's financial statements in respect of the adoption of these standards, amendments and interpretations to existing standards.

4 REVENUE AND SEGMENT INFORMATION

The Group has adopted HKFRS 8 "Operating segments" with effect from 1 January 2009. HKFRS 8 requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to segments and to assess their performance. In contrast, the predecessor standard, HKAS 14 "Segment reporting", required an entity to identify two sets of segments (business and geographical) using a risks and returns approach, with the entity's "system of internal financial reporting to key management personnel" serving only as the starting point for the identification of such segments.

In the past, the Group's primary reporting format was business segments. The application of HKFRS 8 has not resulted in a redesignation of the Group's reportable segments as compared with the primary reportable segments determined in accordance with HKAS 14, nor has the adoption of HKFRS 8 changed the basis of measurement of segment profit or loss. The Group's reportable segments under HKFRS 8 are therefore identical to the business segments under HKAS 14, namely:

- Electronic products – manufacturing and selling of consumer electronic products
- Printed circuit boards – manufacturing and selling of printed circuit boards

The Group's operations are principally located in Hong Kong, Macao and Mainland China. The revenue from external customers in Hong Kong, Macao and Mainland China for the six months ended 30 September 2009 is HK\$300,627,913 (2008: HK\$403,366,791), and the total of its revenue from external customers in other countries is HK\$170,242,704 (2008: HK\$192,414,792).

At 30 September 2009 and 31 March 2009, all of the non-current assets are located in Hong Kong, Macao and Mainland China.

For the six months ended 30 September 2009, revenues of HK\$44,913,578 (2008: HK\$76,440,630) were derived from a single external customer. These revenues are attributable to the printed circuit boards products.

7 INCOME TAX EXPENSE

Hong Kong profits tax has been provided at the rate of 16.5% (2008: 16.5%) on the estimated assessable profit for the period. Taxation on overseas profits has been calculated on the estimated assessable profit for the period at the rates of taxation prevailing in the countries in which the Group operates.

The Hong Kong Inland Revenue Department (the “IRD”) has questioned the basis of tax reporting for certain transactions adopted by certain subsidiaries of the Group in prior years. The matter has not been resolved with the IRD as at the date of approval of this Interim Financial Information. Additional provision for current income tax of approximately HK\$20.5 million and write back of deferred income tax liabilities of approximately HK\$8.3 million have been booked in respect of this matter in the Group’s consolidated financial statements for the year ended 31 March 2008. These are based on management’s estimates and may be different from the final outcome of the matter.

8 DIVIDEND

The Directors do not recommend the payment of an interim dividend in respect of the six months ended 30 September 2009 (2008: Nil).

9 EARNINGS PER SHARE

The calculation of basic earnings per share is based on profit attributable to shareholders of the Company of HK\$2,362,653 (2008: HK\$19,760,401) and on 56,918,520 (2008: 56,918,520) ordinary shares in issue during the period.

As there are no potential ordinary shares in issue, there is no diluted earnings per share for both periods.

4. INDEBTEDNESS

At the close of business on 30 November 2009, being the latest practicable date for ascertaining the information regarding this indebtedness statement prior to the printing of this circular, the Group had outstanding borrowings of approximately HK\$336.4 million, comprising (i) secured bank borrowings of approximately HK\$3.1 million; (ii) unsecured bank borrowings of approximately HK\$259.1 million; and (iii) obligations under finance lease contracts of approximately HK\$74.2 million.

The Group's secured bank borrowings and banking facilities were secured by a legal charge on the Group's leasehold land and building with an aggregate net book amount of approximately HK\$10.5 million as at 30 November 2009. The Group's obligations under finance leases were secured by a legal charge on the Group's property, plant and equipment with aggregate net book amounts of approximately HK\$141.3 million as at 30 November 2009.

Saved as aforesaid and apart from intra-group liabilities and normal trade payables in the ordinary course of business, the Group did not have any bank loans, bank overdrafts and liabilities under acceptances or other similar indebtedness, debentures or other loan capital, mortgages, charges, finance leases or hire purchase commitments, guarantees or other material contingent liabilities outstanding at the close of business on 30 November 2009.

The Directors have confirmed that there have been no material changes in the indebtedness and contingent liabilities of the Group since 30 November 2009.

For the purpose of the above indebtedness statement, foreign currency amounts have been translated into Hong Kong dollars at the rates of the exchange prevailing at the close of business on 30 November 2009.

5. WORKING CAPITAL

In determining the sufficiency of the working capital of the Group, the Directors have made the assumption that (i) the Group's existing banking facilities which are due for renewal within twelve months, will be duly renewed or otherwise replaced by new facilities of equivalent amounts; and (ii) new banking facility of approximately HK\$56.8 million will be duly obtained in the next twelve months.

Taking into account the financial resources available to the Group, including internally generated funds, and based on the assumptions regarding banking facilities as set out in the preceding paragraph, the Directors are of the view that the Group shall have sufficient working capital for its present requirements for at least twelve months following the issue of this circular.

6. MATERIAL ADVERSE CHANGE

For the six months ended 30 September 2009, the revenue of the Group decreased by approximately 21.0%, as compared to the last corresponding period, to approximately HK\$470.9 million as a result of the adverse impacts of the global economic downturn. Together with the increase in depreciation expenses of the new factory in Jiangxi which commenced production in March 2009 and the increase in finance costs caused by the additional loans for financing the construction and operation of the new factory, the profit attributable to the Shareholders for the six month ended 30 September 2009 decreased by approximately 88.0% to approximately HK\$2.4 million. As at 30 September 2009, the Group's net current liabilities amounted to approximately HK\$327.5 million, representing an increase of approximately 27.6% as compared to the figure as at 31 March 2009.

Save for the aforementioned, the Directors confirm that as at the Latest Practicable Date, there have been no material adverse changes to the financial or trading position of the Group since 31 March 2009, being the date to which the latest published audited accounts of the Company were made up.
